

## Voting Keypad Instructions

Will turn green  
after each vote.

Please look at your keypad and note response buttons 1-9.  
(You may ignore the letters for Council voting.)

- To vote YES, press “1.” Watch for the number to display in the window and the green confirmation light.
- To vote NO, press “2.” Watch for the number to display in the window and the green confirmation light.
- To change your vote, re-enter your selection. The system will record your last entry.
- To enter multiple choices for a single question or ballot, press the desired buttons in succession. **Please watch for each number to display in the window and the green confirmation light for each selection.**
- For the first ballot of the Board elections, press the corresponding number assigned to each candidate you wish to vote for, one after the other – **please watch for each number to display in the window and the green confirmation light for each selection** – for a total of 4 choices. The system will record the last 4 buttons pressed. *Voting for fewer than 4 choices will automatically generate an invalid ballot.*
- To change your vote, re-enter the corresponding numbers for your 4 candidate selections. **Please watch for each number to display in the window and the green confirmation light for each selection.** The system will record the last 4 buttons pressed.
- You will have 30 seconds to vote on each ballot.
- Responses are transmitted automatically as indicated by the window display and green confirmation light.
